CLAUDE.md Templates Collection

Overview

The CLAUDE.md file is the heart of Claude-Flow configuration, providing context, constraints, and coordination patterns for AI-powered development. This collection offers specialized templates for different project types, development patterns, and use cases.

Template Categories

By Project Type

Template

[Web Development](#)

[Mobile Development](#)

Progress Dashboard

Collect blob contents...

 Template	 Description	 Best For	 Key Features
 <u>API Development</u>	RESTful and GraphQL APIs	Microservices, serverless	OpenAPI, testing, documentation
 <u>AI/ML Projects</u>	Machine learning and AI systems	TensorFlow, PyTorch, Jupyter	Model training, data pipelines
 <u>Data Science</u>	Analytics and data processing	Pandas, NumPy, visualization	ETL processes, analysis workflows
 <u>DevOps/Infrastructure</u>	Infrastructure as Code	Docker, Kubernetes, Terraform	CI/CD, monitoring, scaling

By Architecture Pattern

 Template	 Description	 Best For	 Key Features
 <u>Microservices</u>	Distributed service architecture	Large-scale applications	Service coordination, inter-service communication
 <u>Monolithic</u>	Single deployable unit	Traditional applications	Layered architecture, MVC patterns
 <u>Serverless</u>	Function-as-a-Service	Cloud-native	AWS Lambda, Azure
 <u>Containerized</u>	Docker applications		

By Development

 Template			
 <u>TDD (Test-Driven)</u>	Test development		
 <u>Agile/Scrum</u>	Scrum development	collaboration	coordination

Collect blob contents...

 Template	 Description	 Best For	 Key Features
 <u>Domain-Driven Design</u>	Business domain focus	Complex business logic	Bounded contexts, entity modeling
 <u>CI/CD Focused</u>	Deployment pipeline emphasis	Production-ready systems	Automated testing, deployment strategies

By Language/Framework

 Template	 Description	 Best For	 Key Features
 <u>JavaScript/Node.js</u>	Modern JS development	Full-stack JS applications	npm ecosystem, ES6+, async patterns
 <u>Python</u>	Python-based projects	Data science, web backends	Virtual environments, package management
 <u>Java/Spring</u>	Enterprise Java development	Large-scale applications	Spring Boot, Maven/Gradle patterns
 <u>React/Next.js</u>	React ecosystem projects	Modern web frontends	Component patterns, state management
 <u>TypeScript</u>	Type-safe development	Large codebases	Strict typing, advanced patterns
 <u>Rust</u>	Systems	Performance-	Memory safety,

By Organization

 Template	
 <u>Solo Developer</u>	Indiv
 <u>Small Team (2-5)</u>	Small coord
 <u>Medium Team (6-20)</u>	Struc work

 Template	 Description	 Best For	 Key Features
 <u>Enterprise (20+)</u>	Large organization patterns	Corporate environments	Compliance, security, governance

Specialized Use Cases

Security-Focused Templates

 Template	 Description	 Best For	 Key Features
 <u>Security Audit</u>	Security assessment focus	Vulnerability analysis	Penetration testing, code scanning
 <u>Compliance</u>	Regulatory compliance	HIPAA, SOX, GDPR projects	Audit trails, documentation
 <u>Zero Trust</u>	Zero trust architecture	High-security environments	Identity verification, least privilege

Performance-Focused Templates

 Template	 Description	 Best For	 Key Features
 <u>High Performance</u>	Optimization-first approach	Performance-critical apps	Profiling, benchmarking,
 <u>Scalability</u>	Scal arch		
 <u>Global Scale</u>	Wor dep		

Educational Templates

 Template	 Description
 <u>Learning Project</u>	Educ

 Template	 Description	 Best For	 Key Features
 <u>Proof of Concept</u>	Experimental projects	Prototypes, demos	Rapid development, exploration
 <u>Portfolio Project</u>	Showcase development	Job applications	Best practices, documentation

Template Structure

Each CLAUDE.md template follows a consistent structure:

 **Project Configuration** - [Template Name]

- ##  **CRITICAL RULES**
- Template-specific critical patterns
 - Essential constraints and guidelines

- ##  **PROJECT CONTEXT**
- Project type and goals
 - Technology stack
 - Architecture decisions

- ##  **DEVELOPMENT PATTERNS**
- Coding standards and practices
 - File organization
 - Testing strategies

- ##  **SWARM ORCHESTRATION**
- Agent coordination patterns
 - Task distribution strategies
 - Parallel execution rules

- ##  **MEMORY MANAGEMENT**
- Context storage patterns
 - Decision tracking
 - Knowledge persistence

- ##  **DEPLOYMENT & CI/CD**
- Build processes
 - Testing pipelines
 - Deployment strategies

- ##  **MONITORING & ANALYTICS**
- Performance tracking
 - Error monitoring

🔒 SECURITY & COMPLIANCE

- Security practices
- Compliance requirements
- Access controls

Quick Start Guide

1. Choose Your Template

Browse available templates

```
claude-flow templates list
```

View template details

```
claude-flow templates show web-development
```

Generate CLAUDE.md from template

```
claude-flow templates apply web-development --output CLAUDE.md
```

2. Customize for Your Project

Interactive customization

```
claude-flow templates customize CLAUDE.md
```

Apply project-specific settings

```
claude-flow config apply --template web-development --stack react,node,postgres
```

3. Validate Configuration

Validate CLAUDE.md syntax

```
claude-flow validate CLAUDE.md
```

Test swarm coordination

```
claude-flow test coordination
```

Template Customization

Environment Variables

```
# Set project context
export CLAUDE_PROJECT_TYPE="web-development"
export CLAUDE_STACK="react,typescript,node,postgres"
export CLAUDE_TEAM_SIZE="small"
export CLAUDE_METHODODOLOGY="agile"
```

Configuration Files

```
# .claude-flow/template-config.yml
project:
  type: web-development
  stack: [react, typescript, node, postgres]
  methodology: agile
  team_size: small

swarm:
  topology: mesh
  max_agents: 8
  coordination: parallel

patterns:
  testing: tdd
  architecture: microservices
  deployment: containerized
```

Template Performance Matrix

Template Category				
Web Development	 	Progress Dashboard Collect blob urls... Check token and scopes... claude-flow-wiki url fetched. Collect blob contents...		
API Development	 			
AI/ML Projects	 			
Mobile Development	 			
DevOps	 			

Contributing Templates

Create Custom Templates

```
# Generate template scaffold
claude-flow templates create my-custom-template

# Edit template
editor templates/my-custom-template/CLAUDE.md

# Test template
claude-flow templates test my-custom-template

# Submit to repository
claude-flow templates submit my-custom-template
```

Template Guidelines

1.  **Clear Documentation:** Comprehensive descriptions and examples
2.  **Specific Use Cases:** Well-defined target scenarios
3.  **Practical Examples:** Real-world usage patterns
4.  **Performance Optimized:** Efficient swarm coordination patterns
5.  **Thoroughly Tested:** Validated across different project types
